

# VIRTUAL JUSTICE®

**Virtual Justice®** is a fresh approach to unified case management. It is designed for all types and all sizes of courts.

VJ offers robust real-time case management features, plus powerful innovations for improving the administration of justice. Coupled with the added benefits of enhancing revenues and controlling costs, VJ is easy to use, and proves to be a very intuitive, timesaving tool for the user.

Smart, consistently applied business objects assist users in everyday tasks to achieve tremendous leverage in dealing with overcrowded courtrooms and ever-increasing workloads. These strides are accomplished without sacrificing the accuracy or the completeness of necessary and desired information for the record.

VJ is equally equipped for duty in any area of the justice workplace – whether it be at the front counter of the clerk’s office, at the local PD or SO, at the jail, on the Judge’s bench in the courtroom, or in the Administrator’s office.

**VIRTUAL JUSTICE®**  
THE FUTURE IN COURT  
TECHNOLOGY
